OBJECTIVE

Aspiring Software Engineer with hands-on experience in Java, JavaScript, React.js, Node.js, MongoDB, and full-stack web development. Experienced in developing real-world web applications, REST APIs, and a government website for AP Forest Academy. Seeking an internship to apply technical skills and contribute to impactful, scalable applications.

EDUCATION

B.Tech, Electronics and Communication Engineering **2023 – 2027**
Godavari Institute of Engineering & Technology **7.33 CGPA**

Intermediate (MPC), Sri Chaitanya Junior College **2021 – 2023**

SKILLS

- **Programming:** Java, JavaScript
- **Web Development:** HTML, CSS, React.js, Node.js
- **Database:** MongoDB, SQL
- **Core Computer Science:** Data Structures & Algorithms (Intermediate), System Design, Computer Networks
- **AI/LLM:** Prompt Engineering, Large Language Models (LLMs)
- **Tools:** Git, GitHub, Postman

EXPERIENCE

Web Development Intern **Oct 2025 – Dec 2025**
Cantilever (Virtual Internship)
Worked on web development, API integration, and RESTful services. Assisted in building and testing web applications while improving debugging and problem-solving skills.

IT GLOBE – Frontend Developer **Jan 2026 – Aug 2026**
Developed and maintained responsive web applications using HTML, CSS, JavaScript, and React.js. Built reusable UI components, implemented responsive designs, and integrated REST APIs to deliver interactive and user-friendly web experiences.

PROJECTS

AP Forest Academy Government Web Project Link
Developed and deployed a production-ready government website for the A.P. State Forest Academy, providing a centralized platform for academy information and training resources. Built responsive web components and structured navigation for administration, officer training programs, syllabi, training materials, facilities, government orders, news, gallery, results, and contact information. Implemented interactive UI sections, responsive layouts, PDF/document viewing, and organized resource navigation to improve accessibility and usability. Managed frontend development, asset integration, production builds, and deployment for desktop and mobile platforms.

Smart Examination Portal Project Link
Developed and deployed a web-based examination platform to digitize the online assessment process. Implemented structured question presentation, online test workflows, answer submission, question management, and automated result evaluation. Designed responsive and interactive interfaces for smooth examination experiences across desktop and mobile devices, reducing manual evaluation and streamlining assessment.

AI Tutor App Project Link
Built an AI-powered learning platform for 6th to 10th grade students that provides instant answers to academic questions, personalized guidance, and an interactive learning experience through a user-friendly interface.

RIET CRT Learning Portal Project Link
Developed and deployed a web-based learning portal for RIET College to support Campus Recruitment Training (CRT) classes. Created a centralized platform for students to access course modules, learning materials, practice resources, and assessments, helping streamline the delivery of CRT training and student preparation.

On-Demand Smart Ambulance Mobile Application Project Link
Developed a Flutter-based mobile application for emergency ambulance booking with real-time location tracking. Designed a user-friendly interface to improve coordination and response time during emergencies.

Student Management API using Node.js and MongoDB Project Link
Designed and developed REST APIs using Node.js, Express.js, and MongoDB. Implemented CRUD operations, database integration, and scalable backend architecture for efficient data management.
